

MIDNIGHT  
ANYTIME  
BLINDS

**Transforma  
Blackout System**

**Made for you.**

# Why Midnight Anytime

**100% blackout with a patented frame system** — no light leaks

**Cordless & motorised** for a safer, cleaner, smarter solution

**Google & Alexa ready** — control by voice or app via the smart hub

**No electrician needed** — fully battery powered and wireless

**Whisper-quiet motor** and 16-channel remote

**Built locally** in South Australia and Western Australia

**Custom-fit up to 3m wide** — perfect for any room

**Backed by a 2-year warranty** and 100% money-back guarantee

**Trusted Australia-wide** by shift workers, families, and light sleepers alike.

**DIY system** for self measure and installation

“**Finally, a room that switched off when I do!**”

## Perfect for:

Bedroom

Nursery

Balcony

Ensuite

Lounge Room

Closet

Spare Room

Living Room

## What is the Transforma System?

Transforma is **Australia's only** retrofit blackout solution that upgrades your **existing roller blind** into a **full blackout system** using the same patented frame technology featured in our motorised eSmart systems.

Instead of replacing your blind, you install our side channels, top pelmet, and weighted bottom bar around it. This blocks out light from every edge and works with both **standard chain-controlled** and **motorised roller blinds**.

## What's Included in the System?

Each Transforma kit includes:

- **Top Pelmet** – blocks overhead light and conceals your roller tube
- **Side Channels** – frame the window and prevent light bleed down the sides with inbuilt blackout Inserts
- **Weighted Bottom Bar** – replaces your existing bar that glides within side tracks
- **Choice of Control** – use your existing chain/motorised blind, or upgrade to our motorised system
- **Fixings and fasteners** – everything you need for a successful install

## What It Works With

**Transforma is compatible with:**

- Standard reveal fit chain-controlled roller blinds
- Motorised roller blinds (low-voltage or mains)
- Window widths from 520mm to 3000mm
- Front roll and back roll configurations
- Most blind brands and hardware systems

## Who It's For

Transforma is ideal for:

- Buyers looking for a **cost-effective** blackout solution
- Renovators looking for a great looking **quick upgrade**
- Families, shift workers, and light-sensitive sleepers
- Homes that already have working roller blinds but just don't like the look
- Those wanting blackout **without replacing their blinds**

## Installation Options

You can:

- Install it yourself using our detailed instructions
- DIY Australia wide
- Order online with fast shipping across Australia

## Why Choose Transforma?

**Transforma gives you genuine blackout without replacing your blind.**

It features:

- Flush-fit side channels for 100% light blackout
- Durable powder-coated aluminium with a clean, architectural look
- Cord-safe compatibility that suits nurseries and bedrooms
- Flexible contour moulding bottom seal for a complete closure
- No need for new wiring, or electrician visits

# About Us

**Proudly Australian Made,  
Owned & Manufactured.**

**Expert Advice  
When You Need It**

**Patented  
Technology**

**2-Year  
Local Warranty**

Midnight Anytime Blinds specialises in blackout systems that deliver 100% blackout, even when using the blackout blinds you already have.

The Transforma System uses our patented frame to block light at every edge. No gaps. No light leaks. Just blackout that works. Each kit is made to order and designed to work with your existing roller blind, whether it's chain-operated or motorised. It includes a custom pelmet, side channels, and bottom bar, all available in a full range of colours to match or contrast with your space.

Manufactured locally in Australia, our systems are certified Australian Made and built for real homes. Local production allows us to deliver nationwide while maintaining premium quality. Installation is simple, with professional or DIY options available.

Trusted by shift workers, parents, renovators, and light sleepers, Transforma delivers long-term blackout performance without replacing your blinds.

**We upgrade what you already have and turn it into a  
blackout system that actually works.**

"Amazing product and even better service.  
The whole process was smooth, and the results  
speak for themselves — total blackout."  
— Rebecca, SA

# Features & Benefits

## Convenience

Upgrade your current roller blind without replacing it. The Transforma System works with your existing chain or motorised setup, no rewiring or app control needed.

## Enhanced Privacy

With Midnight Anytime BLACKOUT Blinds, you have complete control over the amount of light entering your space. Enjoy the ultimate privacy whenever you need it, whether it's for a restful sleep, a private movie night or just the luxury of total darkness on demand.

## Improved Sleep Quality

Our blinds create an environment of complete darkness, essential for improving sleep quality and ensuring you wake up refreshed and ready to seize the day.

## Energy Efficiency

Our blackout blinds help regulate indoor temperatures by blocking sunlight in summer and creating a layer of insulation in winter. They reduce convection across the glass and help stop warm air from re-entering the room — improving year-round comfort and energy efficiency.

## Protection of Interior Furnishings

Harmful UV rays can fade and damage your furniture and flooring. Our blinds provide a protective shield, ensuring your interiors remain vibrant and well-preserved.

## Safety

Our motorised systems are cord-free and completely eliminate the risk of entanglement, making them a safer choice for homes with children and pets. For manual roller blinds, safety will depend on your existing setup — if the chain is exposed (e.g. in reverse roll), it should always be anchored securely following the ACCC mounting guidelines.

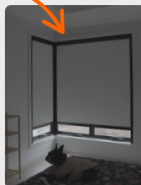

## Customisation

When paired with our motor upgrade and hub, your blackout blinds can operate on a schedule or adjusted to specific preferences, allowing for greater customisation and control over your lighting and privacy needs.

# Customer Testimonials

We installed the motorised blackout blinds in our master bedroom last year and loved them so much that we recently got them for our toddler's bedroom too. They create a full blackout (perfect for getting toddlers/babies to sleep) and were super easy and quick to install. John was an excellent help with both of our orders and was extremely helpful, going above and beyond. We would 100% recommend these to anyone looking for well made, high quality, neat looking and functional blackout blinds.

- Kim B

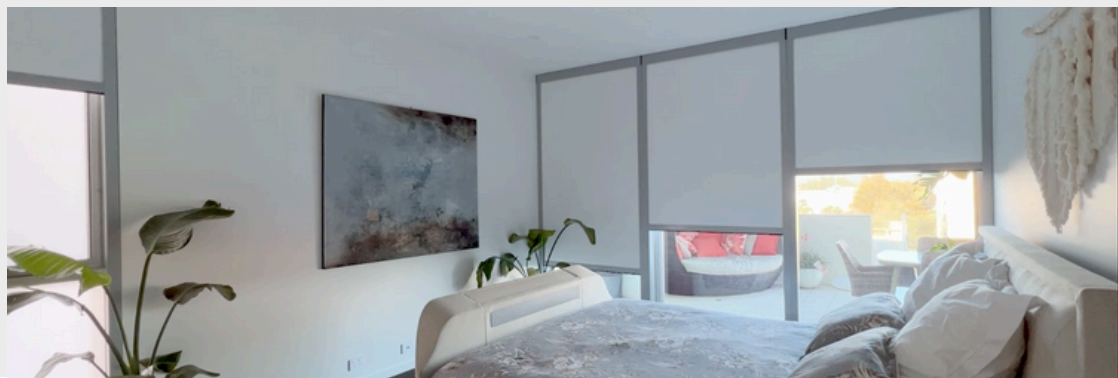

Had a wonderful experience with the company. Prompt in replying to my original enquiry. A quote and measure was done quickly and install was complete within a few weeks of ordering. We upgraded our normal block out blinds to electric block out blinds and would never go back. So easy to use and we love the sheer blind option too, which we didn't have before. Install was quick and fast and price was really reasonable for the amazing quality of the product. Would recommend and will use them again for all our blinds in the future.

- Claire M

We had Midnight Anytime Blinds installed on all the windows in our home yesterday and are absolutely delighted with them. They do exactly what they say and block out all light. John was great in overcoming some fly screen issues we had and the two young men who came to install the blinds were excellent tradesmen with amazing personalities. All in all a worthwhile addition to our home and we would not hesitate in recommending this company.

- Ken H
